Subject: [External] More public hearing, full studies needed - Atlantic Coast Pipeline Water Quality Permit

CAUTION: External email. Do not click links or open attachments unless verified. Send all suspicious email as an attachment to report.spam@nc.gov.

Policy Advisor Tarr and Sec. of DEQ Reagan,

I am writing to urge you to NOT grant the Water Quality permit for the Atlantic Coast Pipeline. The Atlantic Coast Pipeline is not needed, is environmentally risky, and those risks affect poor people of color predominantly (our most vulnerable!) while bringing few permanent jobs to the area. This will also lock North Carolina into another generation of fossil fuel use, delaying the shift to clean energy sources that are more cost effective and healthier for our people. We need more public hearings along the corridor regarding new information the ACP has provided. Finally, when the time comes, I ask you NOT to support granting the 401 Permit for the ACP.

Best regards,
Rebecca Showalter
